## EXPERIENCIA LABORAL

### BI Manager Retail 15/07/2023 - Current

Company: FIFCO S.A

Leading a team of analysts to generate actionable insights for the business and provide support to various departments.

Driving the implementation of automation tools to ensure data availability for informed decision-making across the organization.

Utilizing tools such as Excel, Python, SQL, Tableau, and Power BI to develop analytics solutions, all within the GCP environment.

Collaborating with cross-functional teams to design and deliver strategic data projects that align with business objectives.

### BI Analyst - 01/09/2022-15/07/2023

Company: FIFCO S.A

Responsible for developing data-driven analysis to provide insights and inform the commercial area, helping to shape the overall business landscape for management.

Leading analysis to support decision-making by categories.

Developing dashboards to present the most relevant information to the commercial team.

Executing analytics projects according to business requirements.

### Process Analyst II - Accounts Payable (16/03/2022 - 30/09/2022)

Company: BAC CREDOMATIC (BAC LATAM)

Leading RPA and OCR projects with Automation Anywhere to enhance accounts payable processes.

Mapping and improving workflows, supporting process migration, and driving data-driven decision-making through analysis and reporting.

Supporting management in agile projects as a Product Owner and leading initiatives in inventory management, policy creation, expense management, and reporting.

### Accounts Payable Analyst (15/04/2021 - 15/03/2022)

Company: BAC CREDOMATIC (BAC LATAM)

Processed accounting records and documents to execute regional payments. Collaborated on data analysis and reporting projects to automate information at the regional level. Assisted with process mapping for migration to the shared services center. Supported process improvements for the centralization and automation of payment execution, including developing and analyzing test scenarios to ensure accurate execution of processes. Provided support to various departments by extracting data from different accounting accounts and SAP transactions to implement process improvements.
